

GROWN UP ORGANIC ONIONS

HUMBLE - HEALTHY - WHOLESOME

Grown Up Organics is excited to offer organic onions available year-round from both the Washington and California growing regions.

Grown Up Organic onions started with Farmer Spud Brown located in Central Washington. Spud grows 400 acres of organic onions for Grown Up Organics: Yellow, Red, Sweet and white, and chooses the best seed strains for the highest quality onions on the market.

Farmer Brown has converted most of his land to organic production- the remainder is in transition to organic. Farmer Brown uses rotational cover crops and supports natural pathways for migratory waterfowl to ensure all facets of the proper stewardship of the land.

Grown Up Organics supplies onions to the lower 48 states, Alaska, and all of Canada. They are one of the largest organic onion producers in the USA.
